LETTER; Textbook quest explained;

Abstract (Document Summary)
All we are trying to accomplish with this task is to choose a biology book that teaches the most prevalent theories. The definition of theory is merely a speculative or an ideal circumstance. To present only one theory or to give one option would be directly contradicting our mission statement.

This letter is in regard to the comments made by Beth Eveland from York Township in the June 20 York Sunday News. I assure you that the Dover Area School Board is not going against its mission statement. In fact, if you read the statement it says... to educate our students so that they can be contributing members of society.

I do not believe in teaching revisionist history. Our country was founded on Christian beliefs and principles. We are not looking for a book that is teaching students that this is a wrong thing or a right thing. It is just a fact.

All we are trying to accomplish with this task is to choose a biology book that teaches the most prevalent theories. The definition of theory is merely a speculative or an ideal circumstance. To present only one theory or to give one option would be directly contradicting our mission statement.

You can teach creationism without it being Christianity. It can be presented as a higher power. That is another part of Dover's mission statement comes into play. That part would be in partnership with family and community. You as a parent can teach your child your family's ideology.

HEATHER GEESLEY

DOVER AREA SCHOOL BOARD DIRECTOR
