The “fish-amphibian” transition:

“Fins must have transformed into forelimbs.”
“...no such transitional species have been recovered.”

A few of the animals in the “fish-amphibian” transition

Ray-finned Fish
Lungfish
Eusthenopteron
Panderichthys
Acanthostega
Ichthyostega
Tulerpeton
Greererpeton

Modern amphibians, reptiles, birds, and mammals

Humerus
Radius
Ulna
Distal elements
