## [Matzke profiled in Seed](#) [3]

NCSE's Nick Matzke is among nine people profiled under the rubric "Revolutionary Minds" in the November 2006 issue of [Seed](#) [4] magazine, now available at newsstands. "At a time when intelligent-design rhetoric has persuaded some public schools to include the philosophy in their science curricula," the article begins, "Nick Matzke is championing the cause of science. Even after leaving his mark on the Dover trial, he continues to defend Darwin's theory." Discussed are Matzke's role as spokesperson for NCSE, his writing on [The Panda's Thumb](#) [5] blog ("a hobby that transformed into a secret weapon for the legal team he later advised"), and his vital research leading to the [discovery](#) [6] of the explicitly creationist drafts of the "intelligent design" textbook *Of Pandas and People*. Even after the victory in *Kitzmiller v. Dover*, the article notes, Matzke remains active, with recent contributions to [Nature Immunology](#) [7], [Nature Reviews Microbiology](#) [8], and the new collection [Not in Our Classrooms: Why Intelligent Design is Wrong for Our Schools](#) [9]. He told *Seed*, "it is not enough to just have truth on your side ... You've got to let people know about it."
