[NCSE on Facebook](#) [3]

NCSE now has a group on Facebook! By joining [our group](#) [4] you'll be able to connect with other NCSE members and discuss the latest developments on evolution and creationism. Facebook is a social networking site that lets users post pictures, videos, and notes on their personal profiles and in groups dedicated to various topics and causes. If you aren't already a Facebook member, you'll have to join to see the group, but we hope this will provide a great place for our members to socialize and network.
