["Not in Our Classrooms" lauded in BioScience](#) [3]

Randy Moore reviewed *Not in Our Classrooms: Why Intelligent Design is Wrong for Our Schools* for *BioScience* (November 2007; 57 [10]: 885-886), [writing](#) [4] (PDF), "*Not in Our Classrooms* is a small, impressive book that will be a valuable resource for anyone interested in the various aspects of 'intelligent design' and the evolution-creationism debate." He was especially enthusiastic about Scott's contribution ("one of the best summaries available for the history of the modern controversy") and Jay Wexler's contribution on the legal issues surrounding the evolution/creationism ("should be required reading for all teachers, school administrators, and school-board members"). Moore concluded, "*Not in Our Classrooms* is a powerful, accessible introduction to the many facets of intelligent design. ... If you read just one book about this subject, read this one. Then give the book to others and urge them to do the same." Moore is a professor of biology at the University of Minnesota.

[Not in Our Classrooms](#) [5] was edited by NCSE's executive director Eugenie C. Scott and deputy director Glenn Branch, and contains essays by them as well as by Nicholas J. Matzke (also of NCSE) and Paul R. Gross, Martinez Hewlett and Ted Peters, Jay D. Wexler, and Brian Alters (a member of NCSE's board of directors). The foreword was contributed by the Reverend Barry W. Lynn of Americans United for Separation of Church and State. Praising the book, Bill Nye the Science Guy wrote, "If you're concerned about scientific literacy, read this book. The authors of *Not in Our Classrooms* are authorities on the various battles fought over the teaching of evolution -- biology's fundamental discovery." If you order your copy now from Beacon Press, you receive a 10% discount -- just enter **NCSE** in the discount code field. And if you want postcards advertising *Not in Our Classrooms* to distribute, please get in touch with the NCSE office.
