[Call for Papers: Darwin's Legacy](#) [3]

The Evolution Learning Community at the University of North Carolina, Wilmington, will be hosting "[Darwin's Legacy: Evolution's Impact on Science and Culture](#)" [4] — a multidisciplinary student conference to be held March 19-21, 2009. The conference will be a unique opportunity for undergraduate and graduate students in the natural sciences, social sciences, humanities, and arts who are conducting research or creative endeavors related to evolution to present their research, investigate graduate study opportunities, network, enhance their CVs, and enrich the body of knowledge surrounding evolution. Abstracts are due on January 30, 2009; authors will be notified of acceptance by February 12, 2009.

Abstracts may be submitted to any of the following theme sessions: evolution and the social sciences; evolution and religion; evolution and human uniqueness; economics of evolution and its consequences; the biodiversity crisis and conservation; Darwin's impact on art, music, and literature; sex and evolution; genomes, race, and medicine; evolution and ethics; the future of humanity; species in space and time; speciation and the species problem. Note that papers need not be submitted to a theme session; presentations on any topic related to evolution are welcome. In addition to the student presentations, there will be addresses by keynote speakers, including Kevin Padian, David Mindell, David Buss, and Peter Carruthers.
