## [Kenneth R. Miller honored by AAAS](#) [3]

**Kenneth R. Miller**

Kenneth R. Miller was named as the winner of the 2008 Award for Public Understanding of Science and Technology by the American Association for the Advancement of Science in recognition of "his sustained efforts and excellence in communicating evolutionary science," according to a February 11, 2009, [press release](#) [4]. He will receive the award during a February 14 ceremony at the 2009 AAAS Annual Meeting in Chicago. A Supporter of NCSE who testified for the plaintiffs in the [Kitzmiller v. Dover](#) [5] trial, Miller "made an extraordinarily persuasive public case for the power of science in general, and the validity of evolution in particular, to explain the natural world," AAAS reported in announcing the award. "He did the scientific community an immeasurable service" by helping to uphold the integrity of U.S. science education. Miller is Professor of Biology and Royce Family Professor for Teaching Excellence at Brown University, coauthor of the most widely used high school biology textbook in the country, and author, most recently, of [Only a Theory: Evolution and the Battle for America's Soul](#) [6] (Viking, 2008).
