## [Making the rounds with Randy Moore](#) [3]

**Randy Moore**

In 2009, Randy Moore began to write a regular column for *Reports of the NCSE* in which he introduced the people and places of the creationism/evolution controversy. Now the first year of his "People & Places" column is available on-line. Moore visits [Siccar Point](#) [4], "arguably the most important geological site in the world"; the [Temple of Serapis](#) [5], which appears on the frontispiece of Charles Lyell's *Principles of Geology*; [Dayton, Tennessee](#) [6], which hosted the Scopes trial in 1925; [William Paley](#) [7], whose *Natural Theology* influenced Darwin's thought; and the Creation Evidence Museum in Glen Rose, Texas — both [before](#) [8] and [after](#) [9] its remodel.

A long-time member of NCSE and a recipient of its Friend of Darwin award, Moore is Professor of Biology at the University of Minnesota. If you like his "People & Places" column, you'll be sure to love [More than Darwin: An Encyclopedia of the People and Places of the Evolution-Creationism Controversy](#) [10] (Greenwood Press, 2008; University of California Press, 2009), coauthored with Mark Decker. NCSE's Glenn Branch [praised](#) [11] it as "[a] marvelous trove for the curious browser, who will be constantly tempted to pull the book off the shelf to read a random entry and discover a new fact or two." And you'll also want to [subscribe](#) [12] to *Reports of the NCSE*!
