[The return of Stick Science](#) [3]

Stick Science — the science cartoon contest sponsored by Florida Citizens for Science, a grassroots organization defending and promoting the integrity of science education in Florida — is back! At the FCFS blog (August 1, 2010), Brandon Haught [explains](#) [4], "The basic concept here is to draw a cartoon that educates the public about misconceptions the average person has about science." And lack of artistic ability isn't a problem: "all entries must be drawn using stick figures. This is about creative ideas, not artistic ability."

Entries are due (by e-mail or post) by August 31, 2010. Prizes include various books and t-shirts, and even a telescope kit. Judges are NCSE's executive director Eugenie C. Scott, Carl Zimmer, the author of *The Tangled Bank: An Introduction to Evolution*, Jorge Cham, the writer and artist of the Piled Higher and Deeper on-line comic strip, and Jay Hosler, the author and illustrator of *The Sandwalk Adventures* and *Optical Allusions*. Full details of the contest are [available](#) [5] on FCFS's website.
