["Evolution and its rivals"](#) [3]

"Evolution and its rivals" — a special issue of the philosophy journal *Synthese* focused on the creationism/evolution controversy — was just published. Coedited by Glenn Branch, NCSE's deputy director, and James H. Fetzer, professor emeritus of philosophy at the University of Minnesota, Duluth, the issue (volume 178, number 2) [contains](#) [4] Glenn Branch's introduction; Robert T. Pennock's "Can't philosophers tell the difference between science and religion?: Demarcation revisited"; John S. Wilkins's "Are creationists rational?"; Kelly C. Smith's "Foiling the Black Knight"; Wesley Elsberry and Jeffrey Shallit's "Information theory, evolutionary computation, and Dembski's 'complex specified information'"; Bruce H. Weber's "Design and its discontents"; Sahotra Sarkar's "The science question in intelligent design"; Niall Shanks and Keith Green's "Intelligent design in theological perspective"; Barbara Forrest's "The non-epistemology of intelligent design: Its implications for public policy"; and James H. Fetzer's "Evolution and atheism: Has Griffin reconciled science and religion?" Fortunately, as part of a special promotion on the part of the journal's publisher, access to *Synthese* is free until December 31, 2010.
