[Carnegie Museum of Natural History adds its voice for evolution](#) [3]

The chorus of support for the teaching of evolution continues, with a statement from the Carnegie Museum of Natural History, a place of adventure, discovery and education that welcomes everyone to enjoy the wonders of its collections and exhibitions.

Describing evolution as "the only scientifically rigorous and strongly corroborated explanation for the amazing diversity of life on Earth," the statement [explains](#) [4], "Our educational goal is to help visitors understand and explore the theory of evolution, the observable evidence that supports it, and the scientific questions and debates that are taking place at the edge of exploration about the mechanisms of evolution and its consequences."

The Carnegie Museum of Natural History's statement is now reproduced, by permission, on NCSE's website, and will also be contained in the fourth edition of NCSE's [Voices for Evolution](#) [5].
