## [NCSE's latest in Evolution: Education and Outreach](#) [3]

 Evolution: Education and Outreach  
a SpringerOpen Journal

["Peking, Piltdown, and Paluxy: Creationist Legends about Paleoanthropology"](#) [4] (PDF), by NCSE's Glenn Branch and Eugenie C. Scott, was just published in *Evolution: Education and Outreach*. The abstract of their article: "Because human evolution is often a stumbling block for accepting evolution, creationist legends about paleoanthropology are persistent. Three such legends, according to which paleoanthropology is based on finds that are admittedly fraudulent (Piltdown) or unadmittedly fraudulent (Peking), or is contravened by neglected finds (Paluxy), are critically discussed."

Founded in 2008, [Evolution: Education and Outreach](#) [5] seeks to promote the accurate understanding and comprehensive teaching of evolutionary theory for a wide audience. Starting with its first issue, NCSE regularly contributed a column under the rubric "Overcoming Obstacles to Evolution Education." In 2013, the journal became completely open access, and NCSE plans to continue "Overcoming Obstacles to Evolution Education" under the new system. The first five volumes of *Evolution: Education and Outreach* are now freely [available](#) [6] as well.
