[A preview of *Giants of the Lost World*](#) [3]

NCSE is pleased to offer a free [preview](#) [4] (PDF) of Donald R. Prothero's [Giants of the Lost World: Dinosaurs and Other Extinct Monsters of South America](#) [5] (Smithsonian Books, 2016). The preview consists of chapter 4, "Demise of the Dinosaurs." "Why did the dinosaurs vanish?" Prothero writes. "One popular account is a simplistic story of a colliding object from space as the only cause of extinction. The true story is much more complicated and much more interesting."

Kirkus Reviews praised *Giants of the Lost World* as delivering "amusing anecdotes, a lucid history of evolutionary ideas, stories of the great fossil discoveries, and an entertaining description of animal evolution on an isolated continent." Prothero, a winner of NCSE's Friend of Darwin award, is the author of a number of books, including *Evolution: What the Fossils Say and Why It Matters* (Columbia University Press, 2007) and *The Story of Life in 25 Fossils* (Columbia University Press, 2015).
