## [A glimpse of Climate Change: What Everyone Needs to Know](#) [3]

NCSE is pleased to offer a free [preview](#) [4] (PDF) of Joseph Romm's [Climate Change: What Everyone Needs to Know](#) [5] (Oxford University Press, 2016). The preview consists of chapter 7, "Climate Change and You," which offers to "explore some of the more personal questions that climate change raises for individuals and their families," including "What is the best way to talk to someone who does not accept the growing body of evidence on climate science?"

The reviewer for the *Guardian* writes, "*Climate Change, What Everyone Needs to Know* is a must-read for those who want to become climate literate and join the growing conversation about the greatest threat humanity faces today," and the reviewer for *The Daily Beast* adds, "Given the pressing need for action, *Climate Change* is the right book at the right time: accessible, comprehensive, unflinching, humane."
