## [A preview of Atmosphere of Hope](#) [3]

NCSE is pleased to offer a free [preview](#) [4] (PDF) of Tim Flannery's [Atmosphere of Hope: Searching for Solutions to the Climate Crisis](#) [5] (Grove Press, 2015). The preview consists of chapter 4, "How Are the Animals Doing?" which discusses climate change's threat to biodiversity, as well as a new afterword added to the 2016 paperback edition of the book.

"Thoughtful, candid and — yes — ultimately upbeat, *Atmosphere of Hope* could not be more timely," writes Elizabeth Kolbert (author of *The Sixth Extinction*). "It is just the book the world needs right now." Tim Flannery is a scientist, explorer, and conservationist; he served as head of the Australian Climate Change Commission from 2011 to 2013.
